EXPERIENCE

Release Engineer Intern
Franconnect , India
Duration: Present
Jan 2026 - Present

- Performed manual testing on **franchise management modules** including operations, royalty, CRM, and reporting.
- Identified, logged, and tracked defects using **bug tracking** tools.
- Collaborated with developers and business analysts to clarify **requirements** and **resolve defects**.
- Contributed to improving test coverage and reducing **production defects**.

Manual Testing Intern (Summer Internship)
ABESIT , India
Duration: 3 month
Jun 2025 - Aug 2025

- Performed **manual and integration testing** on multiple software applications, ensuring **functionality**, **usability**, and **performance** met project requirements.
- Designed and executed comprehensive **test cases**, identifying and **documenting defects** for timely resolution.
- Improved **product reliability** by **validating bug fixes** and retesting impacted features.
- Developed skills in **test planning**, **defect tracking**, **regression testing**, and **UI/UX validation**.

Python Intern
Cloud counselage Pvt. Ltd. , India
Duration: 2 months
Oct 2024 - Nov 2024

- Developed **Python scripts** based on project requirements.
- Worked on **data processing tasks,** including **reading, cleaning,** and **analyzing datasets** using libraries like **Pandas & NumPy.**
- Worked closely with other developers, analysts, and managers to gather requirements and implement the solutions.
- Attended meetings and **participated in team discussions** regarding project progress and challenges.

SKILLS SUMMARY

- **Languages:** Java, Python, JavaScript(basic), SQL
- **Tools:** Git, GitHub, VS Code, IntelliJ / Eclipse, Power BI, MySQL
- **Concepts:** SDLC, STLC, Test Case Design, Bug Reporting, Agile, Scrum, V-Model
- **Project Management Tools & Practices:** Scrum, Sprint Planning, Jira
- **Testing Skills:** Manual Testing, Functional, Regression, Smoke, Integration, UI Testing, API Testing
- **Soft Skills:** Problem solving, Attention to Detail, Time Management

PROJECTS

Job Board (Web Application)

- Designed and executed comprehensive **test cases**, identifying and **documenting defects** for timely resolution.
- Covering **100 test cases** with **11 defects** found and resolved in collaboration with the development team.
- Improved **product reliability** by **validating bug fixes** and retesting impacted features.

Fake News Detection System

- Developed and deployed a machine learning model for detecting fake news using **natural language processing** (NLP) techniques.
- Built the model using Python libraries like **scikit- learn** and **TensorFlow**, and implemented **data preprocessing techniques** such as **tokenization** and **TF-IDF vectorization**.
- The model was deployed using **Flask to create a web-based interface** for real-time fake news classification, focusing on accuracy and usability in real-world applications.

EDUCATION

Bachelor's Of Technology (Information Technology)
ABES Institute Of Technology
Ghaziabad, India
Aug 2022- May 2026

High School and Intermediate
Vanasthali Public School
Noida, India
Apr 2019- Mar 2022

CERTIFICATES

- **Testing Basics and Test Management** | Infosys Springboard — Jul 2025
- **Postman API fundamentals** | Lets Upgrade — Jan 2024
- **Online Java Course** | Softpro India Computer Technologies — Apr 2024
- **Google Cloud Computing and Generative AI** | Google Developer Club — Apr 2025
